

Dear Facility Administrator,

After consultation with my surgeon and anesthesiologist, I decided to go to a different facility for my surgery because you were unable or unwilling to provide the Friedberg Method of Goldilocks Anesthesia.

In particular, I was especially disappointed to learn that brain monitoring of patients going under anesthesia is not a routine at your facility.

If you are concerned about losing other patients due to this shortcoming in your facility, feel free to visit www.drbarryfriedberg.com for more information.

Yours sincerely,
